

(HW) CONTENTS

COVER FEATURE

LEGO Sorting Mats

18

PROFESSIONAL DEVELOPMENT

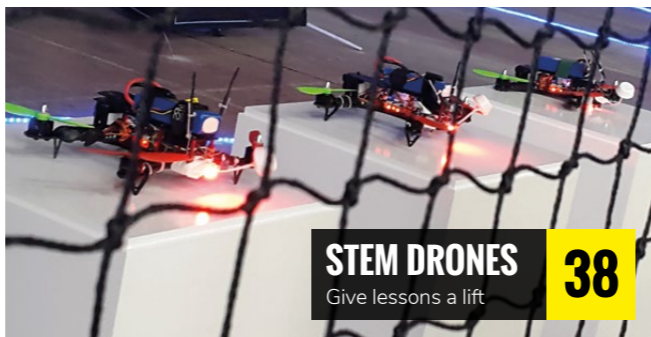

Experts offer their successful approaches

CYBER GAMES

A programme to find the next generation of cybersecurity experts

11

STEM DRONES

Give lessons a lift

38

76

BECOME AN EDUCATOR

How to start teaching computing

58

CRUMBLE CONTROLLER

Fun with physical computing

92

EVENT GUIDE

Tips to run a successful event

CONVERSATION

82 BLUFFER'S GUIDE
Get to grips with pair programming

96 LETTERS
Join the conversation

REVIEWS

86 VISUAL CODING APPS
Blockly, Snap!, EduBlocks, and GameMaker Studio

90 BOOKS
The latest computer science reads

LEARNING

TUTORIALS & LESSON PLANS

46 BINARY ESCAPE ROOM
Test your class on their base conversion skills – who will escape successfully?

48 OOP WITH PYTHON
Moving from simple functions and linear programs to classes and objects needn't be daunting

50 SCRATCH SPELLING TEST
This spelling game is a great way to introduce inputs, outputs, and variables

52 VICIOUS VIKINGS
Bring history to life whilst learning about sequencing, using this Barefoot Computing resource

NEWS AND FEATURES

06 ROYAL SOCIETY REPORT
'After the reboot' finds challenges still exist in computing education

10 NEWS
What else is new in CS education?

14 #INSIGHTS
What the research says about professional development

18 PROFESSIONAL DEVELOPMENT
Expert advice on approaches to it

19 COMPUTER SCIENCE TEACHERS
Five keys to developing them

20 DEVELOPMENT FOR ALL
How can teachers access training?

22 BCS CERTIFICATE
In Computer Science teaching

24 PICADEMY
Get hands on with Raspberry Pi's teacher training programme

26 A PERSONAL APPROACH
Gary Stager's perspectives on CPD

30 JOIN A COMMUNITY
Carrie-Anne Philbin on the importance of CS communities

32 PROGRAMMING PARADIGMS
Do they really exist?

34 DIGITAL LITERACY
Is a focus on programming enough?

36 COMPUTATIONAL THINKING
Explore Code.org's courses

38 STEM DRONES
Engaging pupils with drones

40 THE CODE'S NOT ALRIGHT
Why the 'right way' is not always best when teaching how to code

42 FROM ICT TO COMPUTER SCIENCE
Some of the lessons learned

44 EXPLAINING AI
Add machine learning to Scratch for a different approach to computing

54 MICRO-BIT SCIENCE TEACHING
The BBC micro:bit is a great tool

56 3D PRINTING
Using it across the curriculum

57 AND OR NOT
Logic gates in the GCSE classroom

58 CRUMBLE CONTROLLER
Build a self-driving robot

60 'GOTO' JAIL
Good code is not just about which statements you use

62 THE PRIMM METHOD
Predict, Run, Investigate, Modify, and Make

64 PINARY WARS
From paper to the Raspberry Pi

66 FLIPPIN' CLASSROOM
Best practice with flipped learning

68 WORKING TOGETHER
Collaborative problem solving

70 SHARED CODING
And other teaching techniques

72 MATHEMATICAL MUSINGS
A short cut to calculate big powers

73 PHONICS KRIS-KROSS
Get KS1 pupils to solve logic puzzles while practising phonics

74 APPS FOR GOOD
An inspiring IoT course

76 BECOME A CS EDUCATOR
Steps to a new career

78 WOMEN IN CS
Celebrating women in computer science and engineering

80 TAP INTO I.T. PROS
Programming pros in the classroom

92 EVENT GUIDE - PART 3
How to run an event

97 TEACHERS' KNOWLEDGE
Three overlapping areas explained
